

Journal Name:	Asian Journal of Microbiology and Biotechnology
Manuscript Number:	Ms_AJMAB_12651
Title of the Manuscript:	Investigating the Microbial Contents of Bottled Zobo Drinks in Port Harcourt Metropolis
Type of the Article	

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	In recent years, we have seen a huge increase in microbial diseases associated with the consumption of locally produced beverages, especially in Africa. Diseases such as cholera, typhoid and other gastrointestinal illnesses lead to numerous deaths worldwide. Notwithstanding the increasing studies on bacteriological assessment of locally produced beverages such as Zobo and Kunun Zaki, studies have reported their adverse effects on human health. Therefore, studies on microbiological testing of bottled zobo beverages are of great importance.	
Is the title of the article suitable? (If not please suggest an alternative title)	No... The proposed title of this manuscript should be: " <i>Evaluation of microbial contents of bottled zobo beverages sold in Port Harcourt Metropolis</i> ".	

<p>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>The abstract is not comprehensive as it lacks the correct sequence of components such as background, purpose, focus, methods, results and conclusions.</p> <p>I suggest that the author should reorganize the presentation pattern to address the following brief components of background, purpose, focus, methods, results, and conclusion. Taking only one sample from each sample point is not the correct sampling procedure. The author should have taken at least three samples from each sample point to validate the results. In lines 14 to 22 of the abstract, the generic and specific names of the bacteria and fungi isolated from the samples should be written in italics, e.g. <i>Escherichia coli</i>.</p>	
<p>Is the manuscript scientifically, correct? Please write here.</p>	<p>Unfortunately, this work is at a very low scientific level. There is a lack of concrete examples of specific bacteria associated with Zobo beverages throughout the paper.</p>	
<p>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</p>	<p>The references are NOT sufficient as the author only provided 7 non-recent references. In addition, some references are misquoted and do not support the cited results or claims.</p>	
<p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>In addition, the English language needs to be revised.</p>	
<p><u>Optional/General</u> comments</p>	<p>I appreciate your effort made for writing the manuscript which could be interesting for the research community .</p>	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
