

Journal Name:	Asian Journal of Agriculture and Allied Sciences
Manuscript Number:	Ms_AJAAS_12604
Title of the Manuscript:	Evaluation of growth, yield and nutrient composition of calyx and leave of roselle (<i>Hibiscus sabdariffa</i> L.) cultivars as affected by salt stress conditions in far north region of Cameroon
Type of the Article	Research manuscript

PART 1: Comments

	Reviewer's comment	Author's Feedback (<i>Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here</i>)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Salt stress in a major abiotic stress affecting crops all over the world, especially in arid and semi-arid regions. In this context, it is important to figure out the mechanisms that help plants to overcome this stress, or to cope with it at least. From this point, this research is interesting; as it provides a valuable information about the most tolerant cultivars of roselle.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, but it needs some corrections (as I suggest in the attached file).	

<p>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>The abstract is good, but some words need to be corrected and some sentences need to be rephrased (as I suggest in the attached file).</p>	
<p>Is the manuscript scientifically, correct? Please write here.</p>	<p>Yes</p>	
<p>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</p>	<p>32 references out of 53 are before 2010 46 references out of 53 are before 2015 7 references out of 53 are after 2015 1 reference out of 53 is after 2020 The author has to include more recent references, especially in the introduction and discussion.</p>	
<p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>The English quality of the article is sort of poor, and it needs to be improved.</p>	
<p><u>Optional/General</u> comments</p>	<p>I included my comments in the attached manuscript file. But in general:</p> <ul style="list-style-type: none"> – It is better to use simple past tense to describe the methods and results. – More detailed information about salt stress effects in plants and the mechanisms of salt stress tolerance should be added to the introduction. – Compare your results with more recent studies 	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
