

I. K. Press

Journal Name:	Asian Journal of Current Research
Manuscript Number:	Ms_AJOCR_11998
Title of the Manuscript:	Performance evaluation of Solar Photovoltaic Systems in Anand City, Gujarat
Type of the Article	Original Research Article

General guideline:

This journal believes that no manuscript should be rejected only based on 'lack of Novelty', provided the manuscript is sufficiently robust and technically sound. Too often a journal's decision to publish a paper is dominated by what the Editor/reviewer thinks is interesting and will gain greater readership - both of which are subjective judgments and lead to decisions which are frustrating and delay the publication. This journal will rigorously peer-review your submissions and publish all papers that are judged to be technically sound.

To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

1: Review Comments

	Reviewer's comment	Author's feedback
<p><u>Compulsory</u> REVISION comments</p> <ol style="list-style-type: none">1. Is the manuscript important for the scientific community? (Please write a few sentences on this manuscript)2. Is the title of the article suitable? (If not please suggest an alternative title)3. Is the abstract of the article comprehensive?4. Are subsections and structure of the manuscript appropriate?5. Do you think the manuscript is scientifically correct?6. Are the references sufficient and recent? If you have suggestions for additional references, please mention them in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Energy yield analyzing of PV system is an interesting topic. But in my opinion, the manuscript in the present version is not suitable for publishing as a qualified research paper.</p> <p>It would be better if a complete technical and economic study was conducted considering all specific needed devices and all technical parameters under various operating conditions. A technical and financial study of the connected PV system must be considered to make a complete study.</p>	
<p><u>Minor</u> REVISION comments</p> <ol style="list-style-type: none">1. Is the language/English quality of the article suitable for scholarly communications?	<p>In scientific research papers, it is recommended to use the detailed schematic and block diagrams (Fig. 2: Grid-connected PV system instead of photographs)</p>
