

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

|                          |                                                                                                                                    |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">Journal of Applied Chemical Science International</a>                                                                  |
| Manuscript Number:       | 2026/JACSI/15324                                                                                                                   |
| Title of the Manuscript: | A Methodological Framework for Machine-Learning-Assisted Analysis of AFM-Derived Nanomechanical Features in Supported Lipid Layers |

**PART 2:**

| FINAL EVALUATOR’S comments on revised paper (if any) | Authors’ response to final evaluator’s comments |
|------------------------------------------------------|-------------------------------------------------|
| Accept as authors’ response.                         |                                                 |
